Fujitsu Technology Solutions

- Hiring Manager
- Address: Brussels, Belgium
- Subject: Application for the Junior System Engineer Position

Dear Hiring Manager,

I am writing with great interest to express my motivation for the Junior System Engineer position at Fujitsu. Having recently graduated from EPHEC with a degree in Computer Science, I am eager to apply my skills and build my career in IT infrastructure, storage, and data center technologies with your service team.

My academic background provided me with a strong theoretical foundation in networking and system administration. The hands-on experience gained during my internship at XYZ Tech Solutions was invaluable, allowing me to develop practical troubleshooting and problem-solving abilities. I actively supported senior engineers, which gave me insights into real-world IT operations.

I am particularly drawn to Fujitsu's reputation for innovation and its focus on creating a sustainable future. I believe this aligns with my own professional goals. I am a fluent speaker of both French and English and am actively improving my Dutch, which would be a valuable asset for supporting your clients in Brussels and Flanders.

Thank you for your time and consideration. I am confident that my skills and proactive attitude would be a great addition to your team. I look forward to the opportunity to discuss my qualifications in an interview.

Sincerely,

Théo Mertens
